## Russian-Ottoman Relations 1600-1914

IDC Publishers, in cooperation with the National Library of Russia in St. Petersburg, has for the first time brought together rare primary sources on a vital and dynamic part of the history of Turkey, Russia, the Middle East, and Western Europe. This is the period in which are rooted the present-day influence spheres in the region. Published across Europe over a period of two centuries, these sources provide detailed insights not only into the military ebb and flow of Russian-Ottoman relations, but also into their effects on European public opinion.

### *Sources in Western Languages*

During the seventeenth, eighteenth, and nineteenth centuries, the balance of power between Russia and the Ottoman Empire was constantly monitored in Western Europe, where several powers had designs of their own on some of the Ottoman territories. In Germany and France, in particular, all kinds of accounts, opinions, and plans were published that were influenced by, or aimed to influence, Russian-Ottoman relations. They include publications of relevant government documents, diplomatic reports, travel accounts that provided new details about hitherto relatively unknown regions, and fiercely political (and polemical) tracts and pamphlets designed to rally public support for one power or the other.

### Russian-Ottoman Relations 1600-1914
